UsingPrintf.java

1) Output is below
2) 3 lines above and below
3) Only 2 lines in the main(1. create an instance 2. run the method)
4) Create a method that prints the output below using printf
5) Justify second line to the right(do not use tabs)

Output:
//3 lines above

This is output1.0

                                                This is output2.00

//3 lines below
